

Skoltech

Una università di ricerca internazionale, con forte presenza Italiana

About

Skoltech: who we are

Skoltech is a new model of a university for science and technology in Russia.

It is an international institute that is integrated with society and industry.

The Massachusetts Institute of Technology (MIT) has played an important role in shaping Skoltech.

Fueled by the years of expertise of world-class scientists, Skoltech is altering the present and shaping the future for the better.

Located in the heart of the Skolkovo innovation ecosystem, Skoltech is surrounded by the buzz of innovative technological activities and startups, as well as by the R&D centers of leading technological and industrial companies.

Our mission

- to nurture and foster the Russian sci-tech elite
- to foster cooperation between the East and the West, and to accumulate ideas, educational and scientific methods, practices, and more
- to engage the international scientific community with the aim of addressing global technological challenges
- to lead the change in Russian academia with respect to high-level, cutting-edge education and research methods
- to advise policy makers in strategic areas related to Russia's prosperous future

Skoltech in 2020 - Key Facts

Skoltech entered the top 100 Nature Index 2019 Young University ranking

Over 1,000 students

136 professors

143 postdocs and researchers

202 engineers

Collaborations with Italy

Skoltech is actively engaged in collaborating with Italian institutions and welcomes bilateral exchanges and collaborative programs with Italian universities, and companies.

2018: MoU with Fondazione Bruno Kessler in Trento. (read more: fbk.eu)

1 joint PhD program currently undergoing

2020: MoU with Politecnico di Torino. (read more: esteri.it)

Already had Skoltech students going to Torino, and vice versa.

Participation to European Projects

Skoltech is also very active in European projects, through the Horizon 2020 program of the European Commission.

In more than one occasion, Skoltech was able to obtain funding on an exceptional basis from the European Commission for the uniqueness of its contributions.

Skoltech is open for new partnerships with Italian and European institutions to participate into H2020 and future Horizon Europe research projects.

Thank you for your attention!
